What is expected during this activity?

All users of the cubicle will clean the work surfaces: inside and outside the hoods, on the work benches, sink area, etc. with 70% ethanol. The outsides of the hoods and incubators will be cleaned with 70% ethanol, EXCEPT the front panel of the hoods which turns white with ethanol. Any material that is lying around will be thrown/put away. The areas behind the hoods will be checked for dust and garbage and the cleaning staff will be called to clean those areas.

After completion of work, an email should be sent to tc@bio by an active user mentioning the names of those users who were present for the cleaning task.
