

Title: Molecular Diagnostics [3-0-0-3]**Content :**

DNA, RNA, Proteins: an overview, chromosomal structure & mutations, DNA polymorphisms; Concepts of molecular diagnostics: specificity and sensitivity, ROC; DNA diagnostics: PCR, Real-time PCR and variations, nucleic acid sequencing: new generations of automated sequencers; CRISPR technology and its use in diagnostics; Protein diagnostics: antigen-antibody reactions, ELISA, variations of ELISA; Metabolite diagnostics: detection of glucose and lipids; Detection of genetic aberrations in clinical samples from cancer patients; Point of care devices.
